REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claims 1-6 and 8 are allowed because, the prior art of record specifically Yoshida et al. (US 6,449,378) does not teach, electronic watermark data table for storing first to j-th electronic watermark data, each of which having *two values* depending on the magnitude of a movement, one value corresponding to *low movement* and the other corresponding to *high movement*, when the movement value is compared with a *threshold value* and said movement is based on generation amount from a DCT converter for each picture type and further selecting an electronic watermark data of one type according to a picture type and said movement, and an electronic watermark data selector for selecting an electronic watermark data of one type *according to said picture type and said movement* and an electronic watermark inserter for inserting the watermark data with a *suitable strength* according to *the magnitude* of said movement of claims 1, 3, 4 and 8 combined with other feature and elements of the claims; and movement decision means deciding the magnitude of a movement of original image based on *difference* of the number between the *DCT coefficients output from said DCT conversion step* and the *DCT coefficients of the previous frame that was pre-retained*, and *second multiplier* for subjecting said *selected electronic watermark* selected from the *different types*, to multiplication according to the *magnitude of the movement* obtained based on the difference between said DCT coefficients and inserting the watermark into the image data *after* the second multiplication of claims 2 and 5, combined with other features and elements of the claims.
